QNX Commercial Software License Agreement

The software and related documentation that you are about to access (the "Software", as further defined below) is offered by QNX Software Systems International Corporation ("QSS"), 175 Terence Matthews Crescent, Kanata, Ontario, Canada K2M 1W8, for your use in accordance with the terms and conditions below.

By answering "I ACCEPT" during the download, installation or activation of this Software, you represent that you have read, understand and agree to be bound by the terms and conditions of this QNX Commercial Software License Agreement (the "License").

Background

QSS has developed and licenses a general purpose real-time operating system known as the QNX (R) Neutrino (R) RTOS (the "Neutrino RTOS"). Its microkernel architecture provides an extensible operating system framework based on the foundational components of the Core OS technology. Additional operating system services are implemented by plugging in other modules (e.g., networking, file systems, graphics, browsers, etc.). These software products are available as part of the base QNX Neutrino RTOS Runtime, the Mass Storage Filesystem Technology, the Advanced Runtime Module, or the optional Aviage (TM) Middleware Products (collectively, the "QNX Runtime Products"). When modified or configured to operate on target hardware, the Neutrino RTOS provides a microkernel operating system with advanced memory protection, distributed processing, symmetric multiprocessing, support for multiple APIs, a dynamically upgradeable architecture, and industry-leading real-time performance.

QSS also offers a related set of software development tools known as the QNX Momentics (R) Development Tools (the "Momentics Tools"). Developers use the Momentics Tools to modify or configure QNX Runtime Products and to develop Neutrino RTOS applications. The Momentics Tools include compilers, debuggers, libraries, headers, utilities, sample code, test suites, etc., within an integrated development environment based on the open Eclipse IDE framework.

The base QNX Neutrino RTOS Runtime, the Mass Storage Filesystem Technology and the Advanced Runtime Module are initially delivered with the Momentics Tools and are licensed for development purposes under this License. Aviage Middleware Products are delivered separately and are licensed for development purposes under a separate Addendum to this License for use within specific development projects only. Additional license terms and conditions for those products are specified in the Aviage Middleware Product Addendum that is incorporated herein by this reference. Collectively the QNX Runtime Products (including any optionally-licensed Aviage Middleware Products) and the Momentics Tools are known as the "QNX Development Suite" throughout this License.

More detailed product information is available in the applicable QNX Development Suite License Guide at http://licensing.qnx.com/license-guide/ ("License Guide") a copy of which has also been included in the Software installation media (i.e., typically in the ISO image) and is incorporated herein by this reference.

Certain components of the QNX Development Suite are available from QSS under the terms of the Apache License, Version 2.0 ("Apache 2.0"), the Eclipse Public License ("EPL"), or other open source licenses. All of the open source components in the QNX Development Suite, and the licenses to which they are subject, are identified in the License Guide and the corresponding Third Party License Terms List available at http://licensing.qnx.com/third-party-terms/ ("Third Party Terms") a copy of which has also been included in the Software installation media and is incorporated herein by this reference.

This Commercial Software License Agreement allows you to develop commercial QNX Runtime Product or Momentics Tool applications and QNX Runtime Product derivative works, on your own or with technical support or custom engineering assistance from QSS (see http://licensing.qnx.com/services/). Aviage Middleware Products are licensed under an Addendum to this Commercial Software License Agreement and are offered on a project-specific basis. This License allows you to charge fees for your QNX Development Suite-based products or services, provided that you obtain a separate distribution license for any royalty

bearing QNX Runtime Product components that you want to offer in their original form or as part of your derivative works (see http://licensing.qnx.com/oem-distribution/). Contact an authorized QSS sales representative for more information.

TERMS AND CONDITIONS

1. Definitions.

1.1.   "Development Seat" means an individual developer's workstation (whether a desktop, laptop and/or other computer) used to perform software development with the Momentics Tools.

1.2.   "License Certificate" is a QSS-issued document, provided to you by QSS or one of its authorized distributors, containing a specific "License Key" or "Floating License Key" which unlocks the QNX Development Suite or specific components of that Software on a Development Seat.

1.3.   "Licensee" (or "you") means the individual or entity that accepted and agreed to be bound by the terms and conditions of this License.

1.4.   "Runtime Components" means components of the Software that are intended to be integrated into and distributed as an integral part of a Target System, as described in the License Guide and in Software documentation.

1.5.   "Software" means computer code (in whatever form), and its associated documentation, included in any component of the QNX Development Suite delivered to you by QSS with a corresponding License Certificate, or otherwise expressly licensed to you by QSS pursuant to this License, including software and documentation updates and solutions made available to you by QSS for use under this License during the term of your uninterrupted subscription for Software support pursuant to a Standard Support Addendum attached hereto.

1.6.   "Target System" means any hardware or software product for embedded devices into which QNX Runtime Products have been wholly or partially integrated.

2. License Grant and Consideration. Subject to your payment when due of all applicable license fees (including but not limited to renewal fees for any subscription-based licenses) specified on QSS's (or its distributor's) invoice applicable to the Software (the "Invoice", which is incorporated herein by this reference), and subject to the terms and conditions of this License, QSS hereby grants to Licensee (you) a limited, non-exclusive, personal, non-sublicensable and non-transferable (except as contemplated in Section 21) license for the specific activities and purposes authorized in Sections 3 and 4 below:

2.1.   under QSS copyrights, to copy and to create derivative works of the Software, and pursuant to Section 4.2 to distribute derivative works of the Runtime Components to third parties; and

2.2.   under patent claims owned or licensable by QSS, and that are embodied in the Software as delivered by QSS, to make and to use the Software, and pursuant to Section 4.2 to distribute derivative works of the Runtime Components to third parties. Certain features of the Software products may require additional patent rights not included in this License; such features are noted in the License Guide, and include certain features of the optional Aviage Middleware Products and certain features obtained from other software or hardware vendors. QSS only licenses you the patent rights that it owns or that it can sublicense under the terms of this License without payment of additional royalties. It is Licensee's (your) responsibility to identify and secure any other patent license rights necessary to make, use, import or sell any product or system containing or that uses the Software.

3. Authorized Activities. The Software is licensed only for the specific activities below when used for purposes listed in Section 4:

3.1.   installing the Software on and following normal backup and archiving practices for one (1) Development Seat per License Key. Upon your request and approval by QSS, you may be issued a Floating License Key that authorizes you to install the Software on two (2) Development Seats per Floating License Key for use in a single shared development project in a single country and time zone, as long as only one (1) of those Development Seats is used at a time; and

3.2.   using the Software on authorized Development Seats in order to create, compile, link, install and use Runtime Components, derivative works of Runtime Components, and new or existing applications or modules; and

3.3.   installing and using Runtime Components, or software created pursuant to Section 3.2, on up to five (5) Target Systems per License Key or Floating License Key. Additional Licenses for Target Systems are available upon request from QSS upon payment of additional license fees.

4. Authorized Purposes. The Software is licensed only for the specific purposes below:

4.1.   using the Software to develop, test or maintain Target Systems or applications or modules that extend the QNX Development Suite. This includes determining the suitability of Runtime Components for use in Target Systems; conducting exploratory development or proof-of-concept prototyping of Target Systems; extending hardware or peripheral support for the QNX Runtime Products; developing new applications for or porting existing applications to the QNX Runtime Products or Momentics Tools; participating in projects at the QNX developer community site hosted by QSS (the "myQNX Portal"); and demonstrating and promoting your Target Systems to others, provided that you do not leave copies with third parties. It does not include your use of the Software in a Target System as an end user; and

4.2.   distributing your derivative works of Runtime Components in any form to third parties at the myQNX Portal for the sole purpose of enabling other myQNX Portal members to adopt your modifications, provided that you license your modifications to the Runtime Components, free of charge, under terms consistent with this License and exclusively for use by others in substitution for a corresponding number of QSS-licensed copies of the unmodified Runtime Components. For greater certainty, THIS LICENSE DOES NOT AUTHORIZE YOU TO DISTRIBUTE any part of the QNX Development Suite, or any Runtime Components thereof, as part of your derivative works (except to the extent that QSS or its contributors have expressly licensed that portion of the Software to you under an open source license) unless your licensee already has its own license for the underlying Software from QSS. Commercial distribution licenses from QSS for Runtime Components (and derivative works thereof) are available under separate agreement and are not included in this License (see http://licensing.qnx.com/oem-distribution/); and

4.3.   using the Software to work with other authorized and licensed QNX Development Suite developers to facilitate teamwork in academic development labs or in group projects, including community projects at the myQNX Portal; and

4.4.   using the Software to undertake other activities authorized by QSS in writing either through the myQNX Portal, at http://licensing.qnx.com/csla-faq/ or by email from licensing@qnx.com

5. Deployment of Software and Audits of Software Use.

5.1.   You may deploy the Software to your developers (including to employees of your contractors), who have been assigned Development Seats (and License Keys or Floating License Keys) but only to the extent and for so long as they provide software development services on your behalf. You may also re-deploy that Software from one developer to another as developers and projects change within your organization. In either case you (Licensee) always remain responsible to QSS for the full performance of the terms and conditions of this License, including the limitation on the number of copies installed and used per License Key (or Floating License Key) pursuant to Section 3.

5.2. In order to install and/or activate the Software certain machine-specific information ("Machine Information") is sent to QSS at the time of activation and/or periodically thereafter. This Machine Information may include but is not limited to software identification numbers, MAC addresses, UUIDs, IP addresses, identification numbers set by manufacturers of your hardware and/or identification numbers related to your host operating system. QSS does not collect any personally identifiable information during activation. QSS may collect Machine Information at any time and may use Machine Information for the purposes of verifying compliance with the terms of this License and any other agreements between you and QSS relating to software provided by QSS, but QSS shall otherwise treat such Machine Information as your Confidential Information pursuant to Section 14.

5.3. QSS may require you from time to time, upon thirty (30) days written notice, to provide a written report: (i) indicating the physical and computer address(es)where Software has been or is being deployed; (ii) certifying that components of the Software have been installed and used only on the authorized number of Development Seats and Target Systems, and used only for authorized projects; and (iii) confirming that Software copies have been destroyed in accordance with Section 17 upon the expiration or termination of your license rights, or in accordance with Section 5.1 upon re-deployment of that Software. You (or an authorized officer if you are a legal entity) shall sign the reports to confirm their accuracy.

5.4. QSS reserves the right to audit (or have a qualified third party audit), upon fifteen (15) days prior written notice and at its expense, your compliance with the terms and conditions of this License, including the limitation on the number of copies made per License Key or Floating License Key pursuant to Section 3. The audit shall be conducted under the confidentiality provisions of Section 14 (Confidential Information).

5.5. Audits will not occur and reports will not be requested more than once each year unless discrepancies are discovered or QSS presents reasonable independent evidence that you are not complying with the terms and conditions of this Agreement. Reasonable evidence would include that based on Machine Information collected. If an audit or report reveals use of the Software by you outside the terms of this License, you will reimburse QSS for all reasonable expenses related to such audit or report in addition to any other liabilities you may incur as a result of such non-compliance.

6. Marking of Software and Derivative Works. You must document Software source code to identify and date any changes you make to the Software to create your derivative works. You must include in the source code, and in any notice in an executable version or related documentation in which you describe the origin or ownership of your software, a prominent statement that your work is derived, directly or indirectly, from software provided by QSS. You may not remove from the Software source code any previous copyright, patent, trademark, licensing, or other attribution notices placed there by QSS or other contributors to that Software.

7. Prohibited Activities. You may not:

7.1. decompile, disassemble, decrypt, extract, unbundle, translate, or otherwise attempt or assist others to reverse engineer any part of the Software except as permitted by an open source license applying to a specific part of the Software, or when permitted by an applicable law to correct defects or to achieve interoperability with complementary programs and only if QSS has refused to provide the necessary information or assistance. Except for published source code files that are expressly identified by QSS as open source software, the Software IS NOT OPEN SOURCE; or

7.2. alter, remove, or cover any trademark, logo, proprietary or licensing notices, labels, or marks in or on any part of the Software. You agree to exercise reasonable efforts to ensure that all copies of the Software bear the same notices, labels, and marks contained in or on the original Software; or

7.3. allow shared use of Software on Development Seats, or shared use of License Keys or Floating License Keys (except as expressly allowed in Section 3.1), disclose or distribute License

Certificates, License Keys or Floating License Keys to any others (except as expressly allowed in Sections 3.1 and 5.1), use unauthorized License Keys or Floating License Keys, or circumvent the key activation mechanisms contained in the Software or at the myQNX Portal. You agree to treat License Keys and Floating License Keys as QSS Confidential Information pursuant to Section 14; or

7.4.   directly or indirectly export, import, or transmit the Software to any country in contravention of the laws of that country or the laws of Canada or the United States. Without restricting the foregoing, you may not download or transfer the Software to: (i) any country prohibited by United States and/or Canadian laws and regulations; (ii) any person or entity prohibited from receiving United States and/or Canadian exports (including, but not limited to, those involved with missile technology or nuclear, chemical or biological weapons); or (iii) any country which requires an import or use permit for encryption technology. You (Licensee) represent and warrant that you are not in one of the restricted countries and are not one of the restricted individuals or entities referred to above. You understand that the import or export of the Software may be regulated by some governments due to the Software's encryption capabilities. You accept sole responsibility to ensure that your uses of the Software comply with the law; or

7.5.   use the Software in any application in which death, personal injury, or severe physical or property damage is a foreseeable consequence of Software use or failure (collectively, "High-Risk Applications") including, but not limited to, the operation of nuclear facilities, mass transit systems, aircraft navigation or aircraft communications systems, air traffic control, weapon systems, and direct life-support machines. QSS expressly disclaims any express or implied warranty or condition of fitness for High-Risk Applications; or

7.6.   use the Software to pursue any formal qualification, certification, or designation for the Software unless it is for a specific end user device or unless QSS has provided its express written consent.

8. Preservation of Rights. Except as expressly authorized by QSS, you may not create derivative works of the Software, or distribute the Software or derivative works thereof, in any manner that would cause or require the disclosure of confidential source code of proprietary components of the Software, or cause the Software, in whole or in part, to become subject to the terms of any license that contradicts the terms of this License or that would not protect the rights and obligations of the parties hereunder.

9. Third Party Software. Portions of the QNX Development Suite contain third-party software that is licensed to QSS for limited purposes under terms different from this License, and is therefore provided to you under those different terms. Such licenses include but are not limited to the EPL, GPL, LGPL, MPL, and other open source licenses. QSS may also include certain third party applications in the Software that are provided to you solely for demonstration and internal evaluation/trial purposes. Those third party license terms, and any notices required to be provided by those third party licensors, are set out in the License Guide and in the corresponding Third Party Terms. If the License Guide or Third Party Terms do not contain information about a particular module, then any notices in the corresponding source code shall prevail. You are solely responsible for ensuring that limited-use software (such as device drivers limited to use with specific hardware manufacturers' products, or evaluation/trial versions of certain applications) is not used outside of the limits stated. Updated License Guides and Third Party Terms may be issued for each new version of the Software. You are solely responsible for reviewing and complying with new versions if you adopt Software updates. You are also responsible for reviewing source code and corresponding documentation for any third party derivative works of Runtime Components that you elect to adopt in substitution for unmodified QSS-licensed copies (see Section 4.2) for any supplementary terms and conditions that apply to the third party's modifications to the underlying Software.

10. Ownership and Reserved Rights. QSS and its licensors retain all right, title and interest in and to the Software. QSS and its licensors reserve all rights in the Software not expressly licensed by this License including, without limitation, copyrights and patent rights. Subject to any underlying rights in the Software and the terms and conditions of this License, all right, title and interest in and to any derivative works of Software and other application software that you develop pursuant to this License shall be retained by you. No trademarks or service marks of QSS or its licensors are licensed by this License, and you understand

and agree that QSS trademarks or service mark may not be applied to your goods or services without the express written permission of QSS.

11. Feedback. QSS welcomes suggestions, comments or other feedback about its products (e.g., regarding their utility, reliability, or performance) and your user experience with the Software, as well as any bug-fixes, features, functionality or enhancements you would like to see in future versions (collectively "Feedback"). You agree that all Feedback is and shall be given entirely voluntarily and, even if designated as confidential, will not create any confidentiality obligations for QSS. You agree not to provide any Feedback that is subject to any third party intellectual property rights or that would disclose third party confidential information. Do not disclose to QSS as Feedback any of your intellectual property rights or confidential information if you intend to license it to QSS. In the absence of a separate written agreement between the parties, and in order for QSS to incorporate Feedback that you provide, you (Licensee) hereby agree to assign to QSS all right, title and interest (if any) in and to any QSS-specific Improvements (as defined below) included in or derived by QSS from your Feedback, including any associated intellectual property and moral rights therein. In this section "QSS-specific Improvements" means any work-arounds, bug-fixes, features, functionality, enhancements or other suggested improvements to the Software or to other QNX Development Suite products that you provide to QSS.

12. U.S. Government Rights. If you are a U.S. government or quasi- government entity, then you should be aware that the Software is a "commercial item", as that term is defined in 48 C.F.R. 2.101 (Oct. 1995), consisting of "commercial computer software" and "commercial computer software documentation", as such terms are used in 48 C.F.R. 12.1212 (Sept. 1995). Consistent with 48 C.F.R. 12.1212 and 48 C.F.R. 227.7202-1 through 227.7202-4 (June 1995), all such customers acquire the Software with only those rights set forth herein. Use, duplication, or disclosure by the U.S. government is subject to restrictions as provided in DFARS 227.7202-1(a) and 227.7202-3(a) (1995), DFARS 252.227-7013 (c)(1)(ii) (OCT 1988), FAR 12.212(a)(1995), FAR 52.227-19, or FAR 52.227-14 (ALT III), as applicable. QNX Software Systems International Corporation is the licensor.

13. Support Services. Support from QSS is available under the Standard Support Addendum attached hereto, or a separate Priority Support Agreement with QSS (see http://licensing.qnx.com/services/).

14. Confidential Information.

14.1.   "Confidential Information" means any information disclosed by one party ("Discloser") to the other party ("Recipient"), for the purpose of performing or exercising rights under this License (the "Purpose"), in a document or file clearly marked "Confidential" (or equivalent) or otherwise in any manner or form provided it is clearly identified at disclosure as confidential and, within thirty (30) days of disclosure, is summarized and delivered to Recipient in a document marked "Confidential" (or equivalent). Confidential Information does not include information: (i) available to the public other than by reason of Recipient's breach of this License; (ii) rightfully received by Recipient from a third party without disclosure or use restrictions; (iii) independently developed by or on behalf of Recipient without access to Confidential Information; (iv) previously known to Recipient other than by reason of a prior confidential disclosure from or on behalf of Discloser; (v) hereinafter disclosed by Discloser to a third party without disclosure restrictions; or (vi) compelled to be disclosed in a public manner pursuant to legal, judicial or administrative proceedings or otherwise as required by law, subject to Recipient giving all reasonable prior notice to Discloser to allow it to seek protective or other court orders.

14.2.   Confidential Software. QSS hereby declares, and you (Licensee) agree, that unless the Software is disclosed in source code at the myQNX Portal, then the Software is Confidential Information of QSS and may not be disclosed in source code form to any third party or in any form contrary to the terms of this License.

14.3.   Use and Disclosure Restrictions. Recipient shall: (i) use Discloser's Confidential Information only as necessary to achieve the Purpose for which it was disclosed; and (ii) disclose Discloser's Confidential Information only to persons who have a need to know to achieve the Purpose for which

it was disclosed, and who are employees of Recipient, or of Recipient's affiliates, or of Recipient's or Recipient's affiliates' consultants or professional advisors, provided that all such recipients are bound by law or are subject to agreements that provide obligations at least as protective of the Confidential Information as the provisions of this Section 14.

14.4.   Recipient's Duty of Care. Recipient shall protect Discloser's Confidential Information by using the same degree of care, but no less than reasonable care, to prevent the unauthorized dissemination or publication and unauthorized use of the Confidential Information as Recipient uses to protect its own confidential information of like nature. Recipient shall only make copies of the Confidential Information as necessary to achieve the Purpose for which it was disclosed. Recipient shall reproduce Discloser's proprietary rights notices on all copies in the same manner in which such notices were set forth in or on the original. The mingling of Confidential Information with information that falls within one or more of the exceptions in this Section 14 shall not impair the status of, or the obligations of confidence and non-use respecting, the confidential parts.

14.5.   Duration of Obligations. Each Recipient's duty to protect Confidential Information disclosed to it shall survive termination of this License but will end on the third anniversary of the date of termination of this License. All Confidential Information furnished by Discloser to Recipient, and all copies thereof, which are in the possession or control of Recipient or anyone to whom it has disclosed such Confidential Information shall be and remain the property of Discloser and shall be promptly returned to Discloser or destroyed on termination of this License. Recipient may retain one copy of Discloser's Confidential Information in the confidential, restricted access files of its legal department for use only to prove compliance with the terms of this License.

15. LIMITED WARRANTIES.

15.1.   Background. The QNX Runtime Products comprise parts of a general purpose modular real-time operating system. You will select a subset of these modules for use in a unique hardware and software environment to achieve certain desired functionality and performance. Ultimately, you may find that you cannot achieve your desired results. While QSS is committed to providing a versatile and reliable product, it does not warrant that the Software will function in accordance with its documentation in every combination of hardware platform, software environment and software configuration. You acknowledge that errors are likely to be encountered when the Software is used in your particular application. You therefore accept the responsibility of satisfying yourself that the Software is suitable for your intended use. This includes conducting rigorous testing of the Software in combination with your derivative works and value-added software application(s) on your target hardware platform prior to its initial release, as well as prior to the release of any related software or hardware modifications or enhancements. QSS offers support plans and custom engineering services (both subject to separate agreements) to help developers identify and solve particular Software implementation issues.

15.2.   Early Access. In order to give you the earliest possible access to the latest QNX Development Suite technology, QSS may provide you with access to pre-release versions of the Software. These versions may not have been fully optimized and tested, and may be unreliable. They are delivered "AS IS" and WITHOUT WARRANTIES OF ANY KIND. In no event will QSS be liable under any cause of action whatsoever for damages resulting from the use of pre-release versions of the Software.

15.3.   Warranty of Merchantability for Commercially Released Software. QSS warrants to you for a period of ninety (90) days from the Invoice date that the Commercially Released Software will be Error Free. "Commercially Released Software" means Software in binary form that QSS formally releases together and that is identified in the License Guide as fully supported by QSS; it does not include experimental, beta, trial or unsupported components, or any Software made available on an early access basis as described in Section 15.2, or any derivative works that you create or that you obtain from the myQNX Portal, or software you receive from third parties, or combinations of Commercially Released Software with other software (including but not limited to Software components from other

releases) or hardware. "Error Free" means that the Software, when used in accordance with the associated documentation (including but not limited to developer documentation, reference specifications - e.g. POSIX, read-me files, installation notes, release notes, etc.) on one or more of the "Reference Platforms" identified in the License Guide, behaves the way that documentation says it should. Software will be presumed to be Error Free unless the error or problem can be reproduced on a Reference Platform, and the error or problem can be demonstrated not to result from modifications to, or incorrect or improper use of, the Software.

15.4.   Remedy for Breach of Warranty of Merchantability. Your sole remedy and QSS' sole obligation for any breach of the warranty of Section 15.3 will be, at QSS's option, either: (i) to provide you with a free explanation, workaround or patch that allows the Software to be Error Free, as an interim fix, until QSS provides you with a free Commercially Released Software update that corrects the problem; or (ii) to terminate this License pursuant to Section 17 and, upon confirmation that you have complied with your obligations under this License, QSS will provide a refund of the license fees (if any) that you paid to QSS pursuant to this License.

15.5.   Media Warranty and Remedy. QSS warrants any tangible media on which it delivers the Software to be free from defects in material and workmanship under normal use for a period of ninety (90) days from the Invoice date. QSS is not responsible for media defects that result from accident or abuse. Your sole remedy for any breach of this media warranty will be to receive replacement media.

15.6.   Limited Warranty of Provenance, Indemnity, and Exclusions from Indemnity. QSS is the author of the Software (or has a license from the author) and has the right to deliver the Software to you and, as delivered, the Software is not known to infringe any third party intellectual property rights. In support of the limited warranty of the previous sentence in this Commercial Software License Agreement, QSS offers to defend you against any third party copyright infringement or patent infringement or trade secret misappropriation claims, and to indemnify and hold you harmless from any damages finally awarded in a third party action against you for said claims, based on your use of the Software under the terms of this License, provided that you give QSS prompt notice of, as well as all authority, information, and assistance (at QSS' expense) necessary or desirable to defend such claims. Expressly excluded from this indemnity are: (i) assertions of patent infringement by the use of components of the Software that are identified as Type II or Type III in the License Guide, or assertions of copyright infringement by the use of components of the Software that are identified as Type III in the License Guide, for which QSS has no contractual basis to extend indemnity from its third party suppliers; (ii) assertion of patent infringement by the use of components of the Software that are identified in the License Guide as requiring additional patent rights not included in this License; (iii) patent claims asserting infringement by a combination of the Software and other software or hardware; (iv) patent claims asserting infringement by a component of the Software when used independently of the Software; (v) infringement of patents that are essential to satisfy any published and industry recognized standards/recommendations, including but not limited to standards/recommendations of ITU, IEEE, ETSI, ISO, MPEG, CSS, DVD, JPEG, DivX, Dolby, AVC/H.264, ATM Forum, Frame Relay Forum, SMPTE, ATSE, GSM, IETF, etc.; (vi) infringement or misappropriation of any kind caused by the creation, reproduction, combination, use, distribution or sale of derivative works of the Software; and (vii) any claims relating to modifications of the Software made by or for you.

15.7.   Remedy and Limitation of Damages for Indemnified Claims. With respect to any finding of breach of the warranty in Section 15.6, or if QSS reasonably believes that one or more of the indemnified acts in Section 15.6 have occurred or may occur, QSS will, at its sole expense and option: (i) procure for you the right to continue using the infringing Software; (ii) replace the infringing Software with non-infringing software of comparable function; (iii) modify the infringing Software to be non-infringing; or (iv) if none of the foregoing alternatives is reasonably available to QSS, erminate your right to the Software, but only to the extent necessary to avoid or mitigate damages. You will have the right to terminate all of your rights if you determine such partial termination renders your remaining rights ineffective. Upon such full or partial termination, QSS will refund to you, pro-rata to the extent of such termination, the license fees paid by you pursuant to this License that are associated with the

terminated rights. This Section 15.7 states your exclusive remedies for copyright infringement, patent infringement, and misappropriation of trade secrets by the Software.

15.8. NO OTHER WARRANTIES. Except as expressly provided in this Section 15, the Software licensed and any services provided under this QNX Commercial Software License Agreement are provided "AS IS" and WITHOUT WARRANTIES OF ANY KIND, including without limitation any implied warranties and conditions of merchantability, fitness for a particular purpose, and non-infringement. QSS DOES NOT WARRANT AND NOTHING IN THIS LICENSE IMPLIES ANY WARRANTY that the operation of the Software or access to services will be uninterrupted or error free, or that any errors found will be corrected.

15.9. Survival. This Section 15 shall survive termination and shall apply notwithstanding the failure of essential purpose of any limited remedy.

16. LIMITATION OF LIABILITY. IN NO EVENT WILL QSS, or its affiliates, or their officers, employees, agents, suppliers, distributors, or licensors (collectively "QSS and its Representatives") BE LIABLE TO LICENSEE OR TO ANY THIRD PARTY for any indirect, incidental, special or consequential damages whatsoever including, but not limited to, lost revenue, lost or damaged data, or other commercial or economic loss, arising out of or relating to any use or inability to use Software or services, even if QSS has been advised of the possibility of such damage or claim. IN NO EVENT WILL THE AGGREGATE LIABILITY TO YOU OF QSS AND ITS REPRESENTATIVES FOR ANY DAMAGES ARISING OUT OF OR RELATING TO THIS LICENSE, WHETHER IN CONTRACT, TORT, OR OTHERWISE, EXCEED THE TOTAL FEES YOU HAVE PAID TO QSS FOR USE OF THE SOFTWARE AND SERVICES UNDER THIS LICENSE. This Section 16 shall survive termination and shall apply notwithstanding the failure of essential purpose of any limited remedy.

17. Term, Subscription Renewal, and Termination. The term of this License for paid-up Software licenses shall continue until terminated. You must subscribe to subscription-based Software licenses for at least three (3) years, which means you shall issue a purchase order to QSS for the annual subscription fee: (i) prior to each of the first two (2) anniversaries of the original Invoice date ("Subscription Date"), for the mandatory subscription term; and (ii) prior to any other anniversary of the Subscription Date, in order to continue this License for another year. This License will terminate immediately for subscription-based Software licenses upon the expiration of your License Key or Floating License Key or your failure to pay any optional renewal fee when due. QSS may terminate this License upon thirty (30) days written notice to you of your breach of a material term herein. You may terminate any paid-up License at any time for any reason. All subscription fees are non-refundable. Upon termination, you shall immediately destroy all whole or partial copies of the Software, License Keys, Floating License Keys and License Certificates used under this License that are in your possession or control. Termination is without prejudice to any right or remedy that may have accrued or be accruing to either party prior to termination.

18. Defensive Termination for Patent Infringement Action. This License shall terminate as of the date you institute patent litigation (including a cross- claim or counterclaim in a lawsuit) in any jurisdiction against any entity alleging that the Software infringes or contributes to the infringement of a patent.

19. Governing Law. This License shall be governed by and construed in accordance with the laws in force in the Province of Ontario, Canada, without regard to the conflicts of laws provisions thereof. The parties hereby irrevocably waive: (i) the provisions of the United Nations Convention on Contracts for the International Sale of Goods, and (ii) any right to a trial by jury regarding the resolution of any dispute between the parties hereto arising out of or in connection with this License.

20. Arbitration. It is the intention of the parties to settle any dispute relating to this License; however, if the parties cannot settle any such dispute themselves, then such dispute shall be arbitrated and finally settled under the provisions of the Arbitration Act of Ontario and the National Arbitration Rules of the ADR Institute of Canada, Inc. The place of arbitration shall be Ottawa, Ontario, Canada. The language of the arbitration shall be English. The decision of the arbitrator shall be final and binding on the parties. The prevailing party shall be entitled to recover its costs and expenses from the arbitration, including reasonable attorney's fees.

21. Assignment. Subject to the export restrictions in Section 7.4, you may assign this QNX Commercial Software License Agreement to a third party who has provided QSS with prior written acknowledgement of its acceptance of the License terms and conditions (the "Assignee"). In such a case you must transfer the corresponding License Keys, Floating License Keys and License Certificates to the Assignee and destroy all whole or partial copies of the assigned Software, License Keys, Floating License Keys and License Certificates that are in your possession or control. Expressly excluded from this assignment permission is Aviage Middleware Products, the License for which you may only assign in conjunction with a change of ownership, merger, acquisition, sale or transfer of all or substantially all of your business or assets relating to the project for which the Aviage Middleware Products are specifically licensed. Any other attempted assignment or delegation in violation of the foregoing will be void and of no effect. This License shall inure to the benefit of and be binding upon the parties and their respective successors and permitted assigns.

22. Execution and Acceptance. Nothing but this License (or another written agreement between you and QSS) authorizes you to undertake any of the activities described in this License, and doing so in contravention of these terms and conditions is breach of contract and/or copyright or patent infringement. When you enter your License Key or Floating License Key to unlock the Software this License will be displayed for your review and acceptance. Choosing "I ACCEPT" during that process constitutes your execution and acceptance of this License.

23. Whole Agreement. This License, including the License Guide and Third Party Terms, the Invoice accompanying the Software, and the Aviage Middleware Product Addendum, constitutes the entire agreement between the parties pertaining to this subject matter and supersedes any prior or contemporaneous agreement, representation, statement, negotiation, undertaking dealing with the same subject matter. The provisions of this QNX Commercial Software License Agreement shall prevail in the event of a conflict between any of its provisions and the License Guide or Third Party Terms, or any inconsistent or additional terms or conditions of either party's purchase orders or invoices. No amendment, modification or waiver of any part of this License will be binding unless in a written document that expressly refers to this License and that is signed by both parties.

24. Customer Experience. QSS may contact you to ask about your impressions of the Software, the QNX Development Suite and any services you may have purchased. You are not obligated to provide any answers, but we hope you will give us the opportunity to address any shortcomings you perceive by providing your feedback.

QNX, Neutrino and Momentics are registered trademarks of QNX Software Systems GmbH & Co. KG and are used under license by QNX Software Systems International Corporation.

Aviage Middleware Product Addendum

QNX Software Systems licenses and distributes certain Aviage Middleware Products for use by its customers, subject to the terms of the QNX Commercial Software License Agreement (the "License") and the additional terms in this Aviage Middleware Product Addendum.

You have requested a license to one or more of those Aviage Middleware Products. You are licensing only the specific Aviage Middleware Products listed on the Invoice and described in the corresponding License Guide that accompany the Software (the "Aviage Software"), subject to your payment when due of all applicable license fees (including but not limited to renewal fees for any subscription-based licenses) specified on that Invoice.

This Aviage Middleware Product Addendum is incorporated into the QNX Commercial Software License Agreement, and the Aviage Software is included in the defined term "Software" in the License. All other defined terms in the License shall have the same meanings in this Aviage Middleware Product Addendum.

Some of the Aviage Software may be included in the QNX Development Suite or may be shipped separately. In either event, these products will require a License Certificate in order to be activated. Those License Certificates are subject to the same provisions as specified in the License for the deployment of copies of the Software.

Aviage Software is licensed on a Project basis. The term "Project" means a team of developers at one or more sites who are cooperatively developing a single embedded device, or a closely related family of embedded devices, that: (i) are branded under a unique product name, (ii) use the same Neutrino RTOS board support package; and (iii) deliver substantially the same functionality. Hardware and/or software platforms developed for internal standardization will initially be considered a single Project; however, each customer (internal or otherwise) that adopts the platform for further development is a separate Project.

Aviage Software licenses are specific to a Project and may not be transferred or reassigned to other projects. You may share your licensed Aviage Software with your developers (including with employees of your contractors) who have been assigned Development Seats (and License Keys or Floating License Keys) in accordance with the License, but only to the extent and for so long as they provide software development services on your behalf solely for the licensed Project. You may also re-deploy that Software from one developer to another as developers change within that Project. In either case you (Licensee)always remain responsible to QSS for the full performance of any terms and conditions of this License. Your Aviage Software license ends when the Project for which it was purchased ends.

If you have licensed Aviage Software for one or more Projects, you must identify the Projects in all reports and audits provided in accordance with Section 5 of the License.

Standard Support Addendum

QNX Software Systems offers certain QNX Development Suite technical support and maintenance services, known as "Standard Support" to its customers, subject to the terms of the QNX Commercial Software License Agreement (the "License") and the additional terms in this Standard Support Addendum.

You have requested a subscription to Standard Support for the Software. You are subscribing only to Standard Support for the Software, as listed on the Invoice, subject to your payment when due of all applicable Standard Support subscription fees specified on that Invoice (or any corresponding subscription commencement or renewal invoices).

This Standard Support Addendum is incorporated into the QNX Commercial Software License Agreement. All defined terms in the License shall have the same meanings in this Standard Support Addendum.

During your Standard Support subscription, QSS will provide you with "Help-Desk Services" for the current version of the Commercially Released Software by delivering person-to-person telephone-, email-, or web-based assistance with: (i) installation and configuration issues; and (ii) understanding the functionality and behavior of specific parts; and (iii) isolating problems you encounter by verifying the Software does not behave the way its associated documentation says it should on a corresponding Reference Platform ("Error"); and (iv) providing you with patches and work-arounds for known Errors; and (v) submitting problem reports for confirmed Errors that do not have current solutions. You may report and track your issues at Tech Support on the myQNX Portal. Help Desk Services are for your support and are not to be used for the benefit of other commercial QNX developers who have chosen not to subscribe to Standard Support. However, QSS reserves the right to publish information (including work-arounds and fixes) relating to any issues you report for the benefit of the QNX development community, provided it does not include any details that would identify you or your customers.

During your Standard Support subscription, QSS will provide you with any commercially released Medial (6.x) and Minor (6.x.x) Software updates, as well as any intervening maintenance releases (including service packs and patches) (collectively, "Updates") for use under this Commercial Software License Agreement.

Updates do not include Major Software updates (e.g., QNX 4 to QNX 6) or access to unlicensed products or technologies. You may only use Updates under this License that are released during your subscription to Standard Support. You may only use such Updates in association with your authorized Development Seat and licensed Target Systems. You may not share your Updates with anyone else, unless they are entitled to use them under their own QSS license.

Each subscription is valid for Standard Support services for one Development Seat for one year. Your subscription will end on the anniversary of the Invoice date unless you first renew your subscription by delivering a purchase order to QSS for the Standard Support fee for the Software for the next subscription year. All subscription fees are due in advance and are non-refundable. QSS reserves the right to withhold Standard Support if you have not paid your subscription fees.

See the QNX Standard Support Plan Guide (http://licensing.qnx.com/standard-support/) for further information. Other support and custom engineering services are also available from QSS (see http://licensing.qnx.com/services/).
